**HEALTHCARE  
LAUNDRY**

# PRIMUS® IS THE PAST, PRESENT AND FUTURE OF HEALTHCARE LAUNDRY

**Primus® has the heritage and innovation to deliver exceptional results**

Since 1911, Primus® has innovated to bring its customers and their customers premium laundry results. Over the last 100 years, this constant innovation has positioned Primus® as the industry leader. Exceptional levels of hygiene and service characterize the brand and industry development, particularly in the field of healthcare laundry solutions. Nowadays, Primus® machines are a beacon of efficiency and outstanding hygiene to ensure user satisfaction. The patented technology developed by Primus® for the healthcare industry, such as Optiload® and Trace-Tech®, provides exquisite performance while being user-friendly, and facilitating easy control, monitoring and analysis.

## A SOLID FOUNDATION FOR YOUR LAUNDRY HYGIENE

### IMPLEMENTING THE PRIMCARE SOLUTION WILL ENSURE YOUR LAUNDRY OPERATIONS CONFORM TO BEST HYGIENE PRACTICES

- Where HACCP (Hazard Analysis and Critical Control Points) control measurement is the requirement for the food industry, RABC (Risk Analysis and Biocontamination Control) is the guideline for the laundry industry. Both control systems will help you to **increase the level of hygiene** in your hospital or nursing home.
- A physical wall separates the laundry into two areas: soiled area and clean area.
- No risk of contact or crossing between soiled and clean linen.
- As an option, separate atmospheric pressures can be created between clean and soiled areas to **further reduce the risk of clean linen being soiled by dirty linen.**
- Specific high-temperature **hygiene wash programme** to clean the laundry.
- Offers the best **solution** to keep your linen clean.
- Gives your laundry flexibility to adapt to any **changes in regulations.**

# PRIMUS® WILL BE YOUR PARTNER THROUGHOUT THE ENTIRE PROCESS

## PRIMUS® PROVIDES YOU WITH A TOTAL SOLUTION

### ■ COLLECTING AND SORTING

Presorting of laundry is carried out by collection staff and the different wash loads are separated into wash types by staff wearing protective gloves.

### ■ STORAGE

Linen should be stored no longer than 48 hours, and trolleys should be cleaned before each use. A dedicated room with a lower air pressure, washing station, and floor U-bend also is required.

### ■ WASHING

Wash loads of the same type are processed together to avoid crossing dirty and clean laundry. The Primus® Trace-tech® system controls temperature, mechanics, time and chemicals in order to ensure ensures the optimal wash quality.

### ■ FINISHING

Handling of clean laundry is carried out by staff who have used hand disinfection. Gloves should be worn to avoid clean laundry being soiled.

### ■ CLEAN STORAGE

Clean laundry should be stored directly after processing and covered with plastic film in closed cabinets. The room and the trolleys should be cleaned regularly and separate flows between clean and soiled linen must be respected.

# THE PRIMUS® TOOLS THAT GIVE YOU MORE CONTROL

## EASY AND UNLIMITED PROGRAMMING

The innovative XControl programmer brings laundry professionals unlimited programming possibilities. New washing programmes can be **uploaded quickly and easily** thanks to the handy USB plug.

## SAFE AND USER-FRIENDLY LOCK

**Ease of use, safety and ergonomics** at your fingertips. The patented **Golden Lock system** will help you to easily open the machine before and after the wash cycle. Because the machine will not run until the door is securely locked, safety is ensured.

## CONTROL YOUR COSTS

Optiload® calculates the weight of the load while you load the washer-extractor, and **automatically adapts the amount of water, energy and detergent the machine will use**. This will help you to spend less on energy and water costs and the productivity of your laundry facility will increase, also reducing your operating costs. Win-win!

### FULL QUALITY CONTROL

■ All washers are equipped with the revolutionary Primus® Trace-Tech® management software. A **track-and-trace system** that complies with **RABC hygienic standards**, it allows full quality control by providing records and statistics for each wash load. All data is stored and can be retrieved for creating operations reports.

Parameters are **continually controlled and stored** to bring you a detailed report of the washing process. This enables you to allow you to **check the accuracy** of the programme used.

The machines are equipped with water meters, live temperature measurement, an automatic weighing system and a water drainage tap to enable you to check the entire process.

## 1 PRIMCARE ENTRY PACK

FOR A GOOD LAUNDRY PRACTICE FOUNDATION

Improve the quality of your linen and save time and costs with the Primcare Entry Pack. This solution enables you to **streamline the laundry process**. Your staff will be able to **save time** because the logistical process is very short: the laundry is just

around the corner. No more worries about linen stocks: your staff always has the right stock at their disposal. Moreover, you have the possibility to influence the entire process and benefit from the **lowest cycle cost**.

## 2 PRIMCARE HYGIENE CONTROL PACK

FOR TOTAL SAFETY

The Primcare Hygiene Control Pack ensures you stay on top of the laundry process. This solution focuses on **ultimate safety for patients, and staff** handling linen. Thanks to the innovative barrier

concept, it is almost impossible to mix clean and dirty linen thus ensuring an exceptional level of hygiene for your linen. Train your staff on how to achieve the best possible result and **increase your laundry throughput** by making best use of our innovative machine features, all while improving the quality of your linen.

## 3 PRIMCARE ULTIMATE CONTROL PACK

FOR ULTIMATE CONTROL

**Follow every detail** of the entire laundry process with the Primcare Ultimate Control Pack. **Monitoring and reporting** features track all steps

in the process, from washing, to drying and ironing. This actionable data enables you to optimize your laundry for **maximum efficiency and profitability**.
